Tester 2: Stock: Inventory, Production, Purchases

E.C Commutator Application – test assignment

Before you start

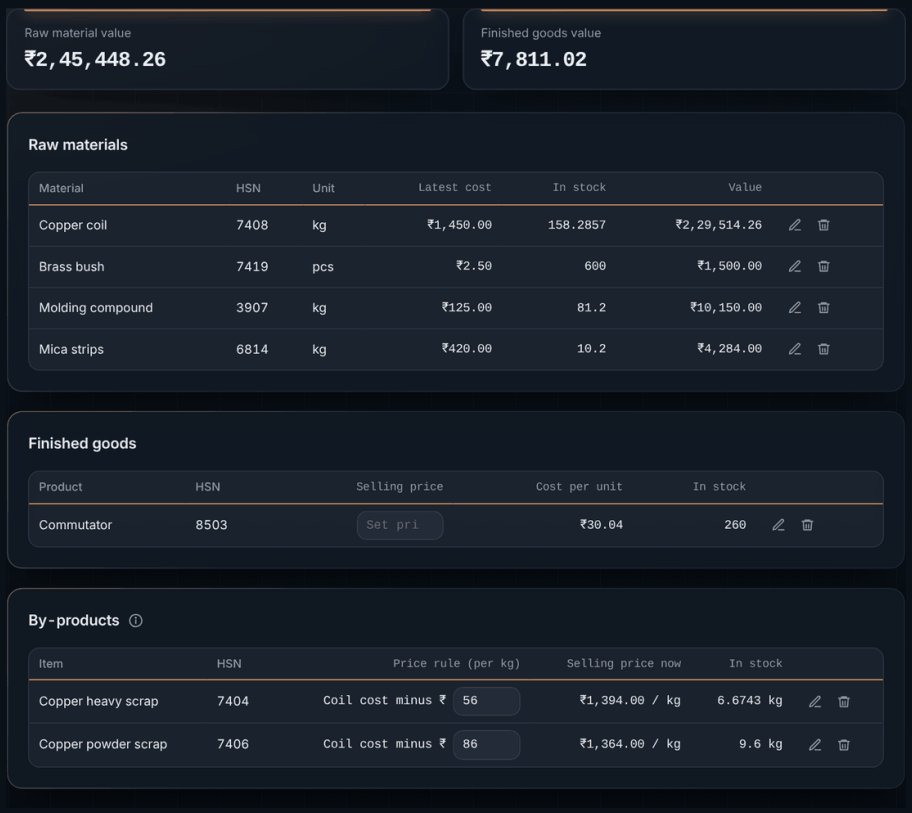

Item	Detail
Open	https://nagasadam.github.io/ec-commutator/test/
Username / password	tester2 / 123456
Version	Test copy with sample data. The orange pill says “TEST COPY · not real data”.
Your module	Inventory · Production · Purchases

All four testers work on the **same** sample data at the same time. Other people’s entries will change totals, so judge each result by the **change** your entry causes, not by the absolute figure. Stick to your module’s entries so results stay clear. Never use Reset or “Delete every business”: it wipes the shared data for all four testers. Use a computer browser (Chrome) for the first pass, then repeat a few steps on a phone.

Inventory

Raw materials, finished goods, by-products and the material needed for each commutator, with live quantities.

Stock overview

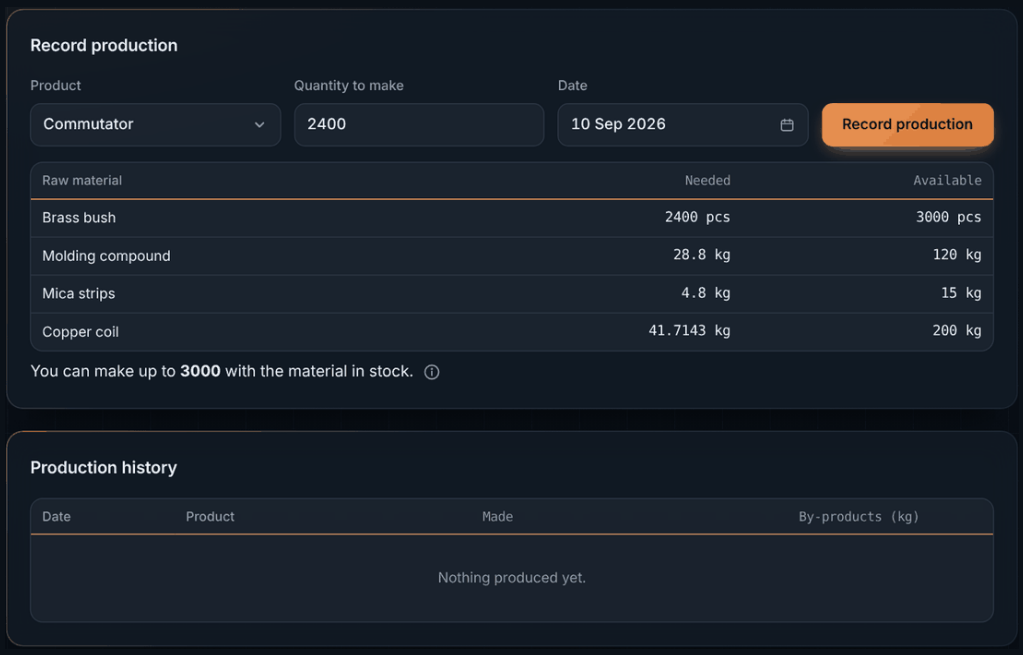

Test steps

#	Do this	Expected result
1	Open Inventory and read the quantities.	Sample data (before others' changes): copper coil 158.29 kg, brass bush 600, molding compound 81.2 kg, mica 10.2 kg, commutators 260.
2	Add a new raw material item with unit, opening stock and cost.	Appears in Inventory and in the Purchases dropdown.
3	Change the material needed (BOM) for a commutator.	New requirement is used by Production and its "can make up to" limit.
4	Change the unit or HSN to text with & and <.	Shows exactly as typed, no broken layout.

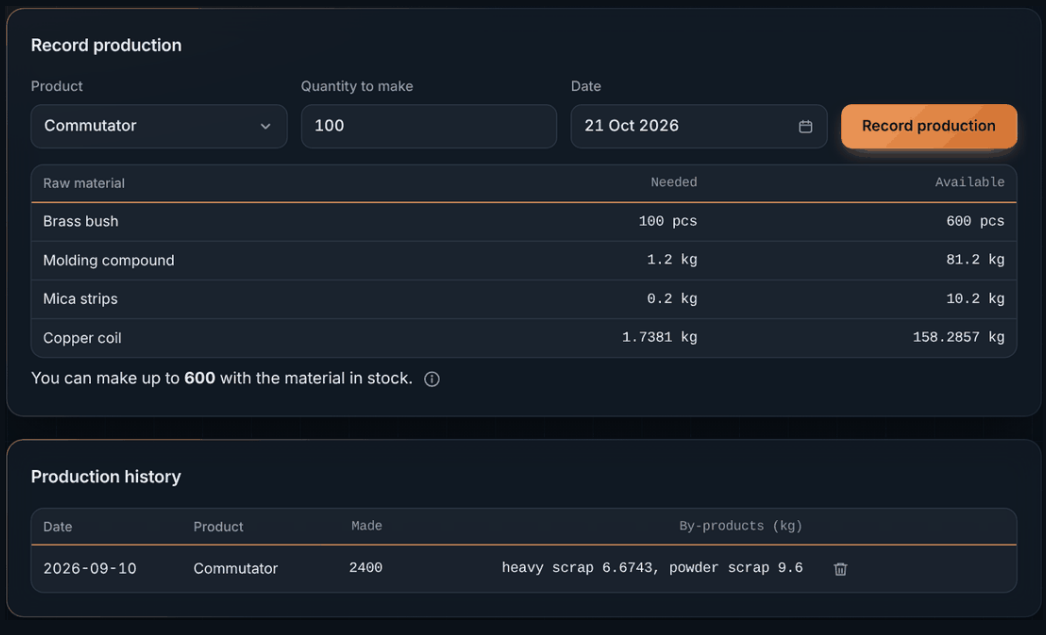

Production

Turn raw material into commutators. Raw material is deducted and scrap or by-products are recorded.

Record production

Production history

Test steps

#	Do this	Expected result
1	Open Production and note “You can make up to N”.	A limit based on the least available material.
2	Record 100 commutators dated today.	Commutator stock +100, raw materials reduced by the BOM amounts, a row in history.
3	Try a quantity above the limit.	Production is not allowed; raw material never goes negative.
4	Use a past date (e.g. last month).	Accepted and listed by date.

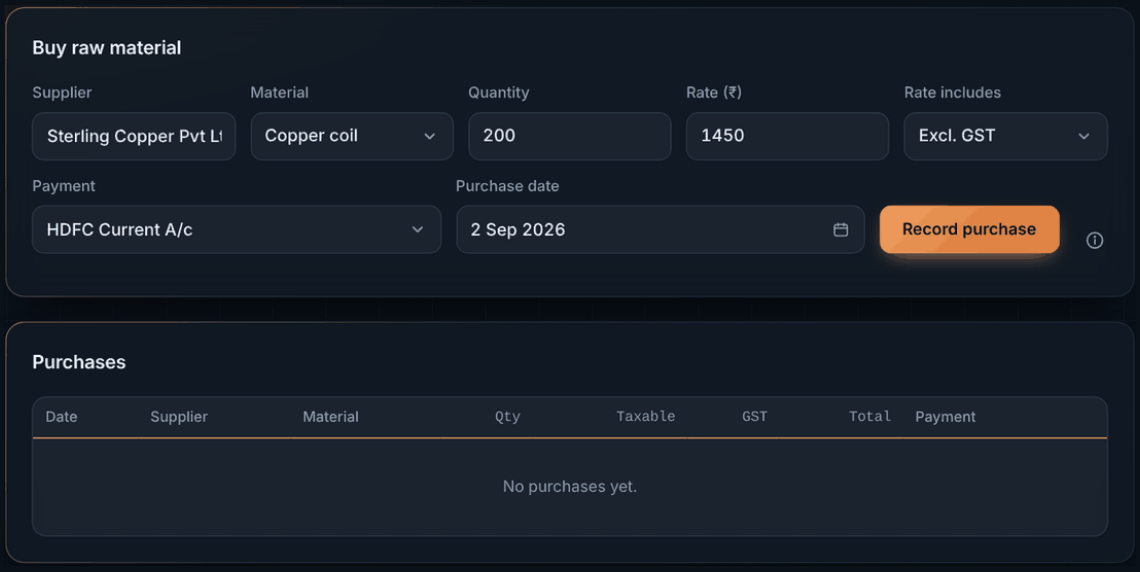

Also try

• Check scrap quantities (copper heavy and powder scrap) change after a run.

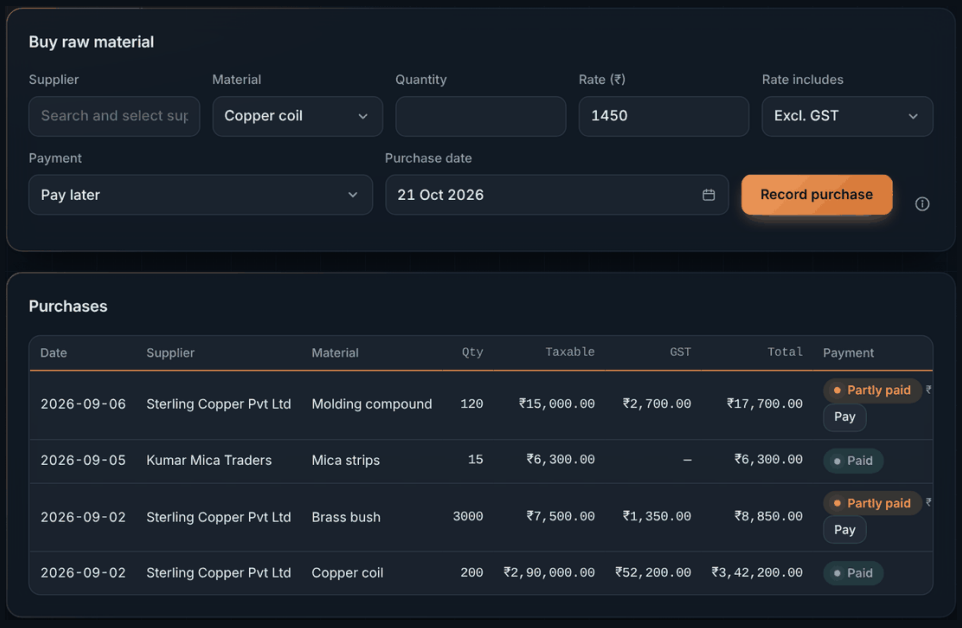

Purchases

Buy raw material and record how it was paid: bank, cash, GPay or pay later. GST is added for companies.

Buy raw material

Purchase list

Test steps

#	Do this	Expected result
1	Buy 10 kg copper coil from Sterling Copper at rate 1,450, GST on, paid from HDFC.	Total ₹14,500 + 18% GST = ₹17,110. Copper stock +10 kg. Bank balance −₹17,110.
2	Buy 100 pcs brass bush at 2.5, pay later.	Total with GST; it appears as payable and supplier balance rises.
3	Buy mica from the person supplier (Kumar Mica Traders), paid in cash.	No GST; cash in hand falls by the amount.
4	Pay Kumar Mica Traders (a person) from HDFC.	Refused: “Individuals are paid in cash or GPay. Pick Cash in hand, GPay or Pay later.”
5	Leave quantity or rate at 0.	“Enter a quantity and rate.”
6	Open the purchase list.	Each purchase shows supplier, material, qty, rate, GST, total and payment status.

Also try

• Create a debit note for part of a purchase on the Returns page (ask Tester 4) and see the purchase list update.

Reporting a problem

For each issue, write one row. Add a screenshot and send the list to the owner.

Module	Step #	What you did	Expected	What happened

Also report anything confusing, slow, misspelled or hard to read on a phone.
